Period fo	The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Response to Amendment

1. This action is in response to the amendment filed on 5/1/06. Claims 6-9, 12, 14, 16 and 20 have been canceled and claims 1-5, 10-11, 13, 15, 17-19 and 21 are pending in the application.

Specification

2. The disclosure is objected to because of the following informalities: Page 1, the applicant must fill the application number into the blanks.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

- 3. The following is a quotation of the second paragraph of 35 U.S.C. 112:
 - The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 4. Claim 18 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
- 5. Claim 18 recites the limitation "said operation data" in lines 1 is vague and indefinite because it's unclear if the applicant refers to the first or second operation data. There is insufficient antecedent basis for this limitation in the claim.

Application/Control Number: 09/972,760

Art Unit: 2616

Claim Rejections - 35 USC § 102

Page 3

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- Claims 1, 11 and 17-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Hanava (USP 5450471).

Regarding claims 1, 11 and 17, Hanawa discloses a method and system for providing a multiple format wireless phone (Figs 6-7, 10, 11 and 15) comprising a wireless phone (Fig 6, Ref 1. Figs 7 and, Ref 11, Fig 11, Ref 730 and Fig 15, Ref 780) having a first wireless communication format (Analog or digital, first or second system, Col. 3, lines 9-13) configured to removably receive at least one wireless module (Fig 7, Ref 13, Fig 10, ref 13A, Fig 11, ref 710 and Fig 15, ref 760) having a second wireless communication format (Analog or digital, first or second system, Col. 3, lines 9-13) and said wireless module in electronic data communication with the wireless phone (Figs 7, 10-11 and 15, the telephones is coupled via electronic data communication), said wireless module configured to provide the second format to the phone (Analog or digital, first or second system, Col. 3, lines 9-13), wherein the module includes a mobile station identification number, said wireless phone configured to receive said mobile station identification number upon verification of proper operation of the module to facilitate use of a single phone number with both formats (Fig 6, Ref 9 and 10 used to verify the conditions of the portable telephone and transferring the conditions information and subscriber's number etc... to the wireless phone; Fig 6, Ref 1, Figs 7 and, Ref 11, Fig 11, Ref 730 and Fig 15, Ref 780, so

Art Unit: 2616

that the telephones can be use with the same telephone number, See col. 9, lines 48-50, col. 11, lines 55 to col. 12, lines 24).

Regarding claim 18, Hanawa discloses operational data comprises at least one wireless format (Analog or digital, first or second system, Col. 3, lines 9-13).

Claim Rejections - 35 USC § 103

- 8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 9. Claims 2-5, 10, 13, 15, 19 and 21 rejected under 35 U.S.C. 103(a) as being unpatentable over Hanava in view of Metroka (USP 5249302).

Regarding claims 2-3, 13 and 21, Hanawa fails to disclose providing at least one wireless module comprises utilizing at least one wireless format selected from the group consisting of CDMA ONE, CDMA 2000 1X, CDMA 2000 3X, CDMA 1X EV, Wideband CDMA, GSM, GPRS and EDGE. In the same field of endeavor, Metroka discloses a multiple mode telephone system herein a wireless module utilizing at least one wireless format selected from the group consisting of CDMA, TDMA "GSM" (Col. 12, lines 19-39).

Since, Hanawa discloses a dual mode telephone system containing two formats such analog and digital. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to apply CDMA and TDMA format as disclosed by Metroka

into the system and method of Hanava. The motivation would have been to utilize of additional transmission capacity of cellular communication system.

Regarding claims 4-5, 10, 15 and 19, Hanawa fails to disclose providing said wireless module with an electronic serial number for storing to wireless phone. In the same field of endeavor, Metroka discloses providing said wireless module with an electronic serial number for storing to wireless phone (Col. 14, line 62 to col. 15, Line 3 and col. 15, lines 32-38 and col. 17, lines 1-28).

Since, Hanawa discloses a dual mode telephone system containing two formats such analog and digital wherein a wireless module provides a subscriber's number such as ID information to the wireless phone. Therefore, it would have been obvious to one of ordinary skill in the art at the time of the invention was made to apply a method and system for providing the radiotelephone serial number of the wireless module to the wireless telephone as disclosed by Metroka into the system and method of Hanava. The motivation would have been to utilize of additional transmission capacity of cellular communication system.

Conclusion

10. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Yamashita (USP 5809432) discloses a system and method for inserting or removing a wireless module of a wireless phone.

Shamlou (USP 6690949) discloses a handset comprising an interface for coupled to a detachable wireless module in order to allow a traveler to exchange a different module when travels to a different region and registered with the visitor network.

Poole (GB 2292653) discloses a mobile system which includes the interface for inserting the modules in order to allow the mobile device to communicate in multiple modes wherein a single telephone number is programmed into a wireless phone.

Kuisma (USP 6259929) discloses a mobile system which includes the interface for inserting the modules in order to allow the mobile device to communicate in multiple modes.

Tom (USP 6690947) discloses a mobile system which includes the interface for inserting the modules in order to allow the mobile device to communicate in multiple modes.

Grimmett (USP 5259018) discloses a system for allowing the NAM of portable to be transferred to the mobile which allows the mobile assuming the same telephone number of the portable device when the portable and mobile are attached to each other via electronic means.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven HD Nguyen whose telephone number is (571) 272-3159. The examiner can normally be reached on 8-5.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Wellington Chin can be reached on (571) 272-3134. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
